All Learning Lab students and Parents,

Please do not hesitate to contact me with questions and/or concerns. All general education teachers are working very closely with me to make sure that every student continues to get what works for them. Each week, I will update here for student assignments. Students are expected to complete each assignment assigned to their grade level. Modifications will be made to assignments before they are posted.

This year the majority of students have been in co-taught instruction. Therefore, during this time of remote learning we will be doing our best to continue with this routine we have been following this school year to the best of our abilities. The staff at WES and myself will still be working closely together to ensure student's needs are met. My goal is to be in most, if not all, google meets and zoom meetings from the general educational teacher. Afterwards finding a time that works for my students and parents so that students can get more targeted one-on-one instruction to meet their needs. The assignments below will be close to what the general education teachers have assigned on their AMI links but with modifications to meet Learning Lab student's needs.

Please remember we are all in this together!

Math				5th Grade Math/ Science Instructions April 6-10th Activity Lesson 27: 2D Figures	6th Grade Math/ Science Instructions April 6-10th Activity Lesson 28: Statistical Questions Lesson 27: Independent Practice sheet
